  - c) Both

## Today's Quiz

The answers are on the following page. No peeking ahead!

## Today's Quiz

### Answers:

Questions 1 – 11: A Syria

Questions 12 – 15: C Both

Questions 16 – 25: B Jordan

### Grading:

1-15 correct answers: Time to do some more studying. You are probably paying too much attention to the news media and the Public Relations campaigns of the Jordanian government. Just because a regime is friendly to the West doesn't mean they are good for their people. It may have more to do with the fact the ruling family of Jordan was put on the throne by the Western powers.

15-20 correct answers: Good results. You show aptitude in independent research and the ability to think for yourself instead of being another sheep led to intellectual slaughter by the mind numbing output of the mass media. You have probably sought out additional information sources beyond American and European media.

20-25 correct answers: Come to the head of the class. You are probably either a native of the region or an experienced traveler of the area. You recognize that Jordan is the tinderbox of the Middle East, and is only a spark away from becoming the next Iran.

### Our next assignments:

1. Why American needs \$4 a gallon gasoline (imagine an America with no dependence on Middle Eastern oil and how different our domestic and foreign policy would be).
2. Understanding the European agenda in the Middle East (and why it's good for Europe to have America pinned down by terrorists at home and drained by military commitments overseas).
3. Why nothing will change with the Israel/Palestinian conflict until the economic and status issues of the people who have made their careers from the conflict is addressed (would you trade your AK47 and hero worship of the masses to returning to your life as a goat herder?).
4. What the Middle East will look like if (or more likely, when) Europe rejects Turkey's entry into the EU and an angry and resentful Turkey turns towards the Islamists, who welcome Turkey's advanced military and industrial might with open arms (how about Islamist terrorists equipped with nukes from Iran and advanced conventional forces from Turkey?).
